Notes

Maya was born on the Deltan Homeworld, where her parents met while her father attended a convention, but was raised on Betazed.

As far as she can remember, she was always interested in engineering and space. When she was of age, she joined Star Fleet. She had to take the Oath of Celibacy even though she is only half Deltan.

She isn't the only one in her family in SF. Her brother Seth joined too. He is still at the Academy.

After her graduation, she was assigned to the USS Paula Greene as an Engineering Officer.
